## PROFILE

---

Motivated Salesforce Developer with 2.5+ years of hands-on experience designing scalable solutions on the Salesforce platform. Proven expertise in automating workflows, optimizing user experiences, and delivering custom applications on Sales Cloud. Adept at translating business requirements into technical solutions with Apex, LWC, and Flows. Seeking new challenges and opportunities for growth in a dynamic environment.

## TECHNICAL SKILLS

---

- **Salesforce Administration** – Data Model, Security Model (Profiles, Roles, Sharing Rules, OWD, Permission Sets), Page Layouts, Validation Rules, Data Loader, Salesforce Lightning, App Builder, Email Templates & Alerts, Flows, Reports & Dashboards
- **Salesforce Development** – Apex (Classes, Wrapper Classes, Error and Exception Handling, Unit Testing Classes (Test Classes), Triggers, Trigger Handlers, Controllers), SOQL, SOSL, DML Operations, LWC
- **Tools** – Git, GitHub, VS Code, Salesforce CLI
- **Other Technical Skills** – Java, Object-Oriented Programming (OOP), JavaScript, React, HTML, CSS, Bootstrap v5, Wordpress, SQL, MySQL

## PROJECTS

---

**iLearnings Pvt Ltd** – Apex, SOQL, LWC, Flows, Reports and Dashboards | [LINK](#) *Nov 2024 - Dec 2024*  
Developed Salesforce EdTech application with supporting documentation for an edtech firm, iLearnings.

- Enhanced lead conversion by implementing a custom web-to-lead enrollment form and automating lead management, onboarding, and communication processes using email templates, alerts, and Flows.
- Created and configured Record Types on Leads to manage B2B and B2C sales processes distinctly.
- Maintained 100% data accuracy during bulk imports of Leads, Employees, and Clients records.
- Developed Apex triggers to automate complex business logic.
- Built 10+ interactive reports and dashboards to provide insights on sales, training, webinar attendance, and lead conversion rates.
- Integrated Skype Click-To-Call CTI for real-time telephony within Salesforce, improving user experience and communication tracking.

**Rent A Car Application** – Apex, SOQL, LWC | [LINK](#) *July 2024 - Aug 2024*  
Implemented Salesforce car rental application enabling users to search, view car details, and share rental experiences.

- Utilized LWC for dynamic front-end interactivity, Apex for backend logic, and SOQL for efficient database queries.
- Integrated SLDS for responsive UI components and LDS for seamless record management.
- Implemented real-time component communication using custom events, public properties, and the Pub/Sub module for cross-component updates.
- Implemented a reliable interface enabling users to input or create custom car types, view results in a responsive grid, and view or add reviews for the selected car.

**Budget Buddy** – MERN, Chart.js, and Google Gemini API | [LINK](#) | [DEMO](#) *Nov 2023 - Feb 2024*  
Developed BudgetBuddy, a MERN-based budgeting web app. Integrated AI for personal finance management.

- Utilized React.js for the front end, Node.js and Express.js for the back end, and MongoDB for data storage.
- Integrated Chart.js for dynamic visualizations and the Google Gemini AI API for personalized financial recommendations.
